A comparative study book (for English speakers basically at USA and Europe) between Muslims and Non-Muslims beliefs, based on scientific and logical evidences entitled “**Voyage from Darkness to Light**”, 2012-2013. Ministry of Awqaf, Foreign Relations Sector, Kuwait.

Work Future:

Miss Zakar had some initiative and original ideas that concern yet unsolved problems in the active frontiers of science. It is worth mentioning two of them here. First, the sounds detected on the Earth whose sources are deep in the Universe: what are their origin and how they cross the Universe void? Second, a cure to AIDS: is it hidden in biophysics? Miss Zakar believes that she can tackle both problems, if she had access to proper facilities, that is, working in

an institution that has required technology as well as authorization to deal with AIDS.
