

Workshop on Cytogenetic Applications

15th - 16th February 2016

This work shop will focus on some aspects concerning cytogenetic applications in diagnostic setting, karyotyping for animal and plants. Furthermore this workshop is an activity managed by PhD student in University of Duhok organized by Dr. Bushra M. Apiro.

Program schedule

15th February 2016

Time	Topics
9:00-9:15	Introduction to the workshop Dr. Bushra Piro
9:15-9:45	Prenatal diagnosis By Awaz A. Saadi UoD - College of Science
9:45-10:15	Androgenesis protocol as the method of haploid production in quercus Spp. By: Laylan Husain Fadladeen UoD - College of Agriculture
10:15-10:30	Coffee break
10:30-12:30	Lab work: Preparation of albino mice chromosomes By : Sherzad Ibrahim College of Veterinary Medicine

16th February 2016

Time	Topics
9:15-9:45	Mandlian disorders By: Abdulader Escander College of Science
9:45-10:15	Karyotyping By: Hoshear Hazim College of Science
10:15-10:30	Coffee break
10:30-12:30	Lab work :Sperm shape abnormalities as indicator of chromosomes aberrations By: Shimal M. A. Omer And Sherzad Ibrahim College of Agriculture College of Veterinary Medicine
12:30-1:00	Round table discussion
